

# S SINGLE BOARD SYSTEMS BY Synertek

*all you need is a  
5v power supply*

Synertek produce a range of systems to match the demands of educators, engineers and industry.

**ASK**  
about our other OEM single board computers and keyboard terminal modules.

Providing systems designers with the desired flexibility, without the cost, time and trouble involved in designing, debugging and manufacturing their own dedicated systems.

10880 S

## ASSEMBLED, DEBUGGED & GUARANTEED!

This is SYM-1: a fully warranted computer on a board, complete with keyboard and display. For OEMs, it is available without keyboard and display. Features include:

- ★ 51 I/O lines, expandable to 71. ★ Six digit display.
- ★ 28 double-function keypad with audio response.
- ★ 4K byte ROM resident user-expandable SUPERMON monitor.
- ★ On-board terminal, TTY, cassette interfaces.
- ★ Standard 1K byte RAM. On-board expansion sockets for 4K byte.
- ★ 4 On-board line drivers/input buffers.
- ★ ROM resident assembler/editor and 8K Basic also available.
- ★ 3 ROM/EPROM expansion sockets for up to 24K bytes programme size.
- ★ SM100, an OEM version of SYM-1 (without keyboard, display, speaker and their associated electronics) is also available.

As Synertek distributors, Royal Micro Systems is dedicated to the supply and technical support of microprocessors, components, and complete systems.
