

You can have a business brain as good as Robert Holmes a Court's, Alan Bond's and John Elliott's.

Really smart (and successful) executives have always been quick to latch onto anything that will make them more efficient.

That's why some of the smartest and most respected business brains in Australia (and around the world) rely on their Toshiba T3100 or T2100, the most exciting new business computers in years.

They provide instant access to accurate information, making quick decisions considerably easier. And, because they are so compact, they can always be close at hand.

They have greater versatility than either the AT or XT (until now, the benchmark) and, of course, they are compatible.

Both come complete with a superb plasma screen that sets new standards of clarity and definition.

The Toshiba T3100 features internal hard disk storage and

an in-built 720KB disk drive. The T2100 offers the choice of either internal hard disk with a disk drive or dual internal drives.

All at a price that makes other business computers as over-priced as they are over-sized.

So make the business decision that some very clever business people have already made. Toshiba T3100 and T2100. One less thing to go wrong.

TOSHIBA

ONE LESS THING TO GO WRONG.
