CARE  
CARD

**"REST Assured**

**. . . it's DOMINO"**

"Inviting . . . Luxurious . . . Nice"—

Remember how fitting your mattress

looked on its matching

Spring Base, in  
your store?

A Spring Base does  
much more than im-  
prove appearance —

it gives much greater comfort  
and longer life. Saggy, old-style  
bases can never support your mattress  
in the way that a new, matching  
DOMINO Spring Base will do.

## *Congratulations on your choice of a*

### *DOMINO Quality mattress . . .*

*For your greater comfort—and long life for your mattress, we recommend:—*

- (1) TURN your mattress over—and also turn head to foot—once weekly for the first six months. This ensures evenly spread settling of the generous layers of soft filling that cover the springs.
- (2) THEREAFTER, turn over and around at regular intervals—say, monthly
- (3) ONLY a matching Spring Base will prevent sagging. If your mattress sags its comfort is greatly reduced and its interior construction is permanently distorted.
- (4) AIR your DOMINO mattress regularly. If possible, give it an occasional sun-bath.
- (5) AVOID using a wooden platform. It is hard, unyielding and prevents circulation of air. It can lead to mildew forming on the ticking, due to condensation.

*IMPORTANT—Remove polythene wrap before using*
