

INTRODUCTION

This switchboard, on which all calls are operator connected, has been designed to meet the needs of smaller business and commercial organisations.

FEATURES

- * Lamp indication of incoming exchange and extension calls.
- * Lamp supervision of call progress.
- * Audible alarm associated with signalling lamps.
- * Flexible night switching—valuable for after hours.
- * Operator recall during an exchange line call.
- * Exchange line calls are automatically held—enables operator to introduce calls with secrecy.
- * Extension users can dial their own exchange calls when connected to an exchange line by the operator.

OPERATOR TRAINING

Is provided on request, free of charge, by skilled service advisers.
